

No Claims/Copays

Nationwide Coverage

Consults within 1-3 days

Continuous Care

Over 30 million Americans are without regular access to primary care.

No Copay for Services

With virtual primary care, there are no copays for doctor visits, making healthcare more accessible and reducing financial barriers to receiving care.

Family Coverage

The plan extends beyond the individual, covering up to 7 family members, ensuring that all family members receive the medical care they need without additional expenses.

Easy Access to Virtual Doctors

Patients can consult with healthcare professionals through virtual platforms, providing convenience and flexibility. This allows for real-time consultations, diagnoses, and treatment plans, no matter where you are.

Includes Your Complete Metabolic Profile

Request your Complete Metabolic Profile from your primary care physician. The lab costs are included when ordered at Quest Diagnostics or Lab Corp. This blood draw will show early detection risks for A1C, liver function, kidney function and more.

People without primary care are 40% more likely to visit the emergency room for preventable conditions.
